

COMMITTED TO BEING GREEN-FRIENDLY

Nature Stone® is dedicated to protecting the environment. We practice environmental responsibility according to sustainability concepts developed by the United States Green Building Council's Leadership in Energy and Environmental Design (LEED®) program.

Green-friendly attributes of Nature Stone® include:

- Nature Stone® is composed of 100% solids epoxy binders, elastomeric sealants, and polymer topcoats that are FDA-compliant.
- The chemicals used in Nature Stone® products emit no volatile organic compounds (VOCs).
- Nature Stone® chemicals are monitored under the International Council of Chemicals Association's Responsible Care® program.
- An anti-microbial agent in our product prohibits the growth of mold and safeguards indoor air quality.
- Nature Stone® does not require chemicals or waxes to maintain it. Annual steam cleaning and extraction are all that are necessary to keep a Nature Stone® floor clean and healthy.
- The long-term durability of Nature Stone® means it is replaced less often than most other types of polymer-based flooring products.
- Waste stream reduction through recycling and proper disposal.
- Manufactured locally to reduce pollution generated by transporting products.

Safe for You and the Environment

Nature Stone® is dedicated to protecting the health of your family and our community by manufacturing safe, environmentally friendly floor covering products. Over the last 20 years, Nature Stone® has taken great pride and care in formulating and providing floor covering products that are safe for employees and dealers to handle and install; and safe for you to own and care for.
